Hi! I'm Ahmad Yar

DATA & AI ENGINEER

I'm Ahmad Yar — part-time cloud wrangler, full-time bug whisperer. I automate like my coffee depends on it, connect APIs like they're childhood friends, and break things just enough to fix them better. If it's repetitive, I'll automate it. If it's working, I'll "optimize" it until it stops. Let's call it ✨ innovation ✨.
